

Naloxone Best Practice Guideline Project Collaboration Structure

For more information about the project please visit <https://crism.ca/naloxone-distribution/>.

Leadership Group

Investigators from across the country form the Leadership Group. The group will provide direction and expertise throughout the BPG development process.

Research Team & Working Group

The Research Team & Working Group will collaborate with other committees, conduct necessary research tasks, and facilitate BPG development.

Methodology Advisory Committee

The Methodology Advisory Committee will make recommendations to the wider group regarding methods for project.

External Review Committee

The External Review Committee will provide an independent and objective assessment of the guideline development process and results.

Guideline Steering Committee

The Guideline Steering Committee will steer discussions, encourage constructive debate, summarize main points and key decisions, and give oversight to the guideline development process.

Guideline Development Panel

The Guideline Development Panel will vote on the key questions that need to be considered before recommendations can be made.

Affected Community Committee

The Affected Community Committee will be consulted on the values and preferences of people with lived experience related to naloxone distribution and use in opioid overdose.

Clinical Expert Committee

The Clinical Expert Committee will provide guidance and recommendations on the use of naloxone in opioid overdose from a clinical perspective.
